

LinuxForce Fact Sheet

Business Overview: LinuxForceSM is a leading technology services firm specializing in the development, implementation, management and support of free and open-source software (FOSS) systems.

LinuxForce is centered in the greater Philadelphia region, but can remotely deliver services via the Internet for clients around the world. Our leadership and track record of delivering positive business results to our clients since 1996 have made us the “go-to” firm for organizations wanting to

- migrate to Linux and FOSS from proprietary operating systems,
- upgrade from commercial Linux distributions to more stable, secure and flexible ones like Debian GNU/Linux and Ubuntu,
- more proactively administer their Linux-based systems and redundant server clusters, and
- better support their open-source applications such as web services, E-Mail, firewalls, databases, eCommerce, and VoIP.

Services:

- Open Source Strategy and Planning
- Remote ResponderSM: Systems Maintenance & Monitoring with Support & Emergency Coverage
- E-Mail Systems with Anti-Spam & Anti-Virus Service
- Managed Firewall Systems
- Systems and Network Auditing
- Systems and Network Security
- Systems Analysis and Design
- Systems Installation and Integration
- Systems Migration
- Web Design, Development and Hosting
- LAMP Web Application Development including Drupal
- Database Administration and Programming
- Custom Programming
